DALTONS
FRESH  FARM
EGGS

 01895 632152

The logo for Dalton's Eggs is displayed on a dark blue-grey background. The word 'DALTONS' is written in a large, white, bold, sans-serif font with a black outline. Below it, the words 'FRESH' and 'FARM' are written in a smaller, white, bold, sans-serif font, separated by three yellow eggs. The word 'EGGS' is written in a very large, white, bold, sans-serif font with a black outline. At the bottom, a white phone icon is followed by the phone number '01895 632152' in a white, bold, sans-serif font with a black outline.

Pynchester Moat

The moat was known as 'Pynchester' Moat and is a Scheduled Ancient Monument. In 1994, the The Corporation of Hillingdon, as part of a management programme for Hillingdon, England, set up a programme of work aimed at restoring and enhancing the appearance of the monument. This has included clearing the moat, across the back by way of a bridge and improving fencing and planting to help protect the moat banks from erosion. The Corporation's volunteers have also been removing some of the rubbish, household rubbish and other clutter.

This is one of only a few medieval moats which have survived in Greater London.

As a Scheduled Ancient Monument protected under the 1979 Ancient Monuments and Archaeological Areas Act, any work causing damage to the monument should be reported to the police.

Please help in keeping it free of rubbish and avoid the moat banks so you help protect it. If you are interested in joining the Corporation's volunteers or in any other projects visit us on Twitter @Hillingdon or call 01895 556000 for further information.

The name 'Pynchester'

'Pynchester Farm' was mentioned in a list of 1201 which listed with other properties owned by the Swallow Estate, Wharfedale. It is not clear what the moated site here is, but the name has been generally accepted as 'Pynchester'. The Hereford Enclosure Map of 1873 shows that the moated site lay on land known as 'Pynchester Mead'. This belonged to the Blackheath Estate between 1822-1921, before it was conveyed with other land to the Borough of Hillingdon in compensation for lost grazing rights.

The excavation

The moat was excavated in the early 1990s. The moat was found to be a Scheduled Ancient Monument. The excavation revealed the foundations of walls, large quantities of red tiles and a great deal of household rubbish, very similar to that found at Northfleet Manor and at Colindale, which have been dated to the late 13th century. Excavation of the causeway showed that originally there was a wooden bridge across the moat here, the causeway being a wooden beam supported on the 13th century. The 'Surrey Ware' pottery found in the excavation, which has dates and decoration of the moat, to the 13th, 14th and 15th centuries, is now in the possession of the British Library.

The moat

Most English moats were dug in the late 13th and early 14th centuries. At Pynchester, the moat's main purpose was probably to act as a symbol of status. However, it would also have provided a convenient source of water supply and source of fish for engines and fishways, a quick means of crossing, a source of fuel and for defensive purposes, between the house and the workings of the farm.

The plan

The plan shows the square island plot with the causeway reduced in size by the excavations, on the west side. At the top of the moat is the site of the stone up level which would once have had the moat from the River Pinn. In the 19th century, the moat was filled with a ditch running parallel to the moat and joining the Pinn, which would have carried away surplus water.

1873 Ordnance Survey map

A 14th Century Pinner Jar found at the moat site. It is made of white clay moat with grains of quartz, and decorated with a green lead glaze very common during the Medieval period.
